Allowable Subject Matter

1. Claims **1-15** are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding *amended* claim **1**, *Brederveld et al.* (U.S. 5,898,679) teaches a system comprising wireless access points that communicate with mobile stations outside their range via relay stations as shown in Figure 1 and spoken of on column 4, line 55 – column 5, line 7.

Brederveld et al. as well as the other prior art of record fail to teach the generation of a time-shifted partial frame structure by a forwarding mobile terminal that is based upon a system-wide known frame structure of the access point, and the use of this frame structure by the forwarding mobile terminal to control the transmission between the forwarding mobile terminal and a mobile terminal outside the range of the access point.

Regarding *amended* claims **2-15**, these claims are further limiting to claim **1** and are thus also allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments with respect to *amended* claims **1-15** have been fully considered and are persuasive. The rejections of these claims have been withdrawn.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wichman (U.S. 5,930,240), von Brandt (U.S. 6,424,633), and Chan et al. (U.S. 6,721,305) are other references considered relevant to this application.
